OBJECTIVE

Entry-level software engineer enthusiastic about pursuing opportunities in web development roles.

EDUCATION

Bachelor of Engineering , Jeppiaar Engineering College Computer Science	2018 - 2022
Class XII , Asan Memorial Higher Secondary School	2017 - 2018

SKILLS

Technical Skills	React, Express, Node, Python
Soft Skills	Adaptability, Time Management, Communication, Leadership

CERTIFICATIONS

FullStack Development Imarticus Learning	June 2023 - Feb 2024 <i>India, Chennai</i>
Android Development Greens Technology	Jan 2021 - Apr 2021 <i>India, Chennai</i>
Python Development NIIT	May 2018 - July 2018 <i>India, Chennai</i>

PROJECTS

Ecommerce Site. Engineered a cutting-edge e-commerce platform leveraging the power of the MERN stack. Seamlessly integrated responsive design, secure payment gateways, and intuitive user interfaces. Resulting in a dynamic online shopping experience, optimized for performance, reliability, and customer satisfaction, setting new standards in e-commerce excellence! ([Try it here](#))

Url Shrinker. Developed a URL shortening project with the MERN stack, streamlining long URLs into concise links. Implemented robust backend functionality for link management and tracking, coupled with a sleek frontend interface for easy navigation and usage. ([Try it here](#))

Sentiment Analysis. Created a sentiment analysis project using Python Flask, analyzing text for emotional tone. Employed Flask for efficient web application deployment, integrating powerful sentiment analysis algorithms. Delivered a user-friendly interface for input and result visualization, enhancing text understanding and interpretation. ([Try it here](#))

ACHIEVEMENTS

- Won 2nd Prize in National Hackathon at Anna University
- Won Coding Challenge in College Competition.
- Participated in Many IOT Events and Hackathons.
