SKILLS

• React • Express • Node • MongoDB • SQL • Python • Git • AWS

PROJECTS

CommerceConnect   Demo

- Engineered a cutting-edge e-commerce platform leveraging the MERN stack.
- Integrated responsive design, secure payment gateways, and intuitive user interfaces.
- Enhanced user experience with advanced product filtering and search functionality.

MernChat   GitHub

- Developed a real-time messaging platform with the MERN stack.
- Enabled user authentication, direct messaging, and group chats.
- Added WebSockets to enable RealTime Messaging Experience.

Bank-Management System   Demo

- Created a comprehensive Bank Management System with modern web technologies.
- Incorporated secure user authentication, account management, and transaction tracking.
- Integrated real-time notifications for account activities and transactions.

DoConnect   Demo

- Built a StackOverflow-inspired application using JavaScript, React, and Nodejs.
- Users can post questions, receive answers, and engage in discussions.
- Designed a voting system for answers to highlight the most helpful responses.
